

Set up your kid's iPhone.

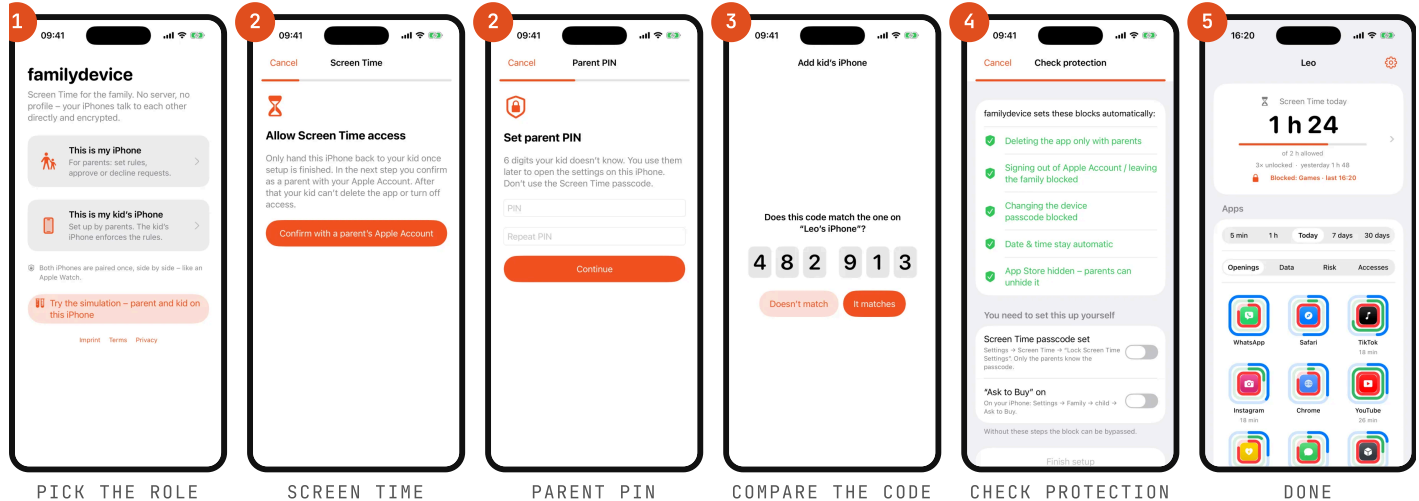

Strict by default. You only loosen what is too much for you.

TWO THINGS FIRST

— The kid's iPhone is signed in with a child account of your Family Sharing group (Settings → Family).

— familydevice is installed on both iPhones (TestFlight invitation). Bluetooth and Wi-Fi are on.

WHAT IT LOOKS LIKE

FIVE STEPS

- 1 "This is my iPhone" PARENT IPHONE**
Open the app, tap "This is my iPhone", enter your name. Allow notifications — that is how your kid's requests reach you.
- 2 Screen Time and parent PIN KID'S IPHONE**
Open the app, "This is my kid's iPhone", your kid's name. "Confirm with a parent's Apple Account" gives the app Screen Time access. Then set a 6-digit parent PIN your kid does not know.
- 3 Pair side by side BOTH**
Parent iPhone: "Add kid's iPhone", tap "Leo's iPhone". Both iPhones show the same 6-digit code — tap "It matches" on both. From now on everything between your iPhones is end-to-end encrypted.
- 4 Permissions and protection KID'S IPHONE**
Answer the four permissions (location: "Always"). Then set a Screen Time passcode (Settings → Screen Time) and turn on "Ask to Buy" on your iPhone (Settings → Family → child). Once both are ticked, tap "Finish setup".
- 5 Assign apps, done PARENT IPHONE**
Tap Leo, tap "Social Media", "Choose app", tick the category "Social". Same for Games ("Games") and Video ("Entertainment"). Hand the iPhone back.

— ACTIVE RIGHT AWAY · NOTHING TO SET UP

Bedtime 21:00–07:00 the whole iPhone, except "Always Allowed"

School Mon–Fri 07:30–14:00 social media, games and video are off

Daily limits social media 30 min · games 45 min · video 45 min · 2 h in total — at weekends 45 · 90 · 90 · 3 h

Blocked ads & trackers, malware & phishing, adult websites

Only with you deleting the app, installing apps, clock, device passcode, Apple Account

Too strict? On your iPhone: tap Leo, tap the rule, change it — two taps. Your kid taps "Request more time" on the block screen; you approve right from the notification.
